

**The only cloud-based**  
medical billing software  
for your practice

# Introducing myMPS

## Benefits that help your practice thrive

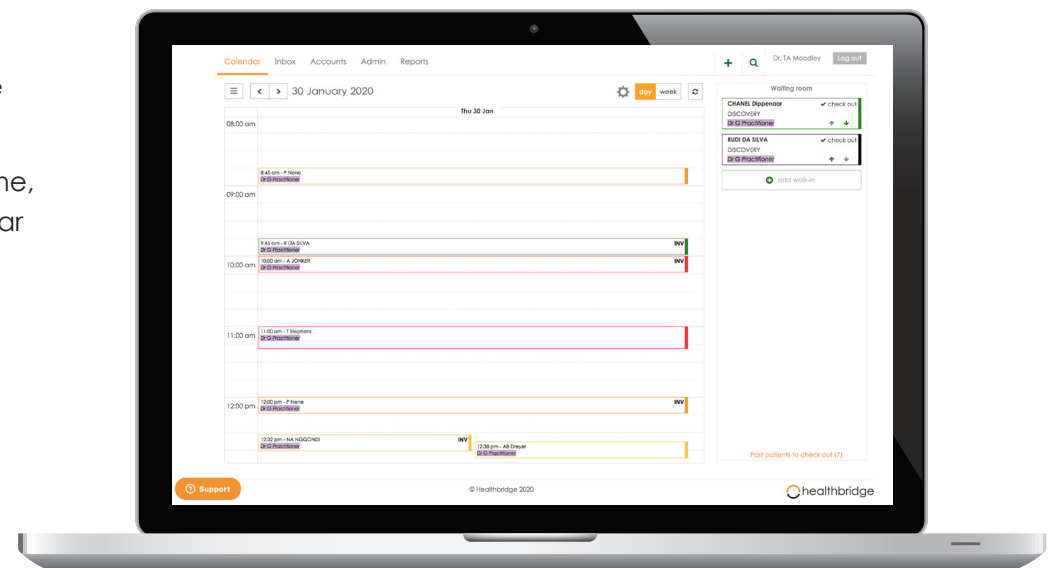

myMPS is a cloud-based medical billing platform designed to help staff with their admin. myMPS has an online calendar & inbox that lets staff know what admin needs to be done. It also automates many of the admin tasks such as patient appointment reminders, patient benefit checks & reconciliations; thereby giving staff more time to focus on patient service.

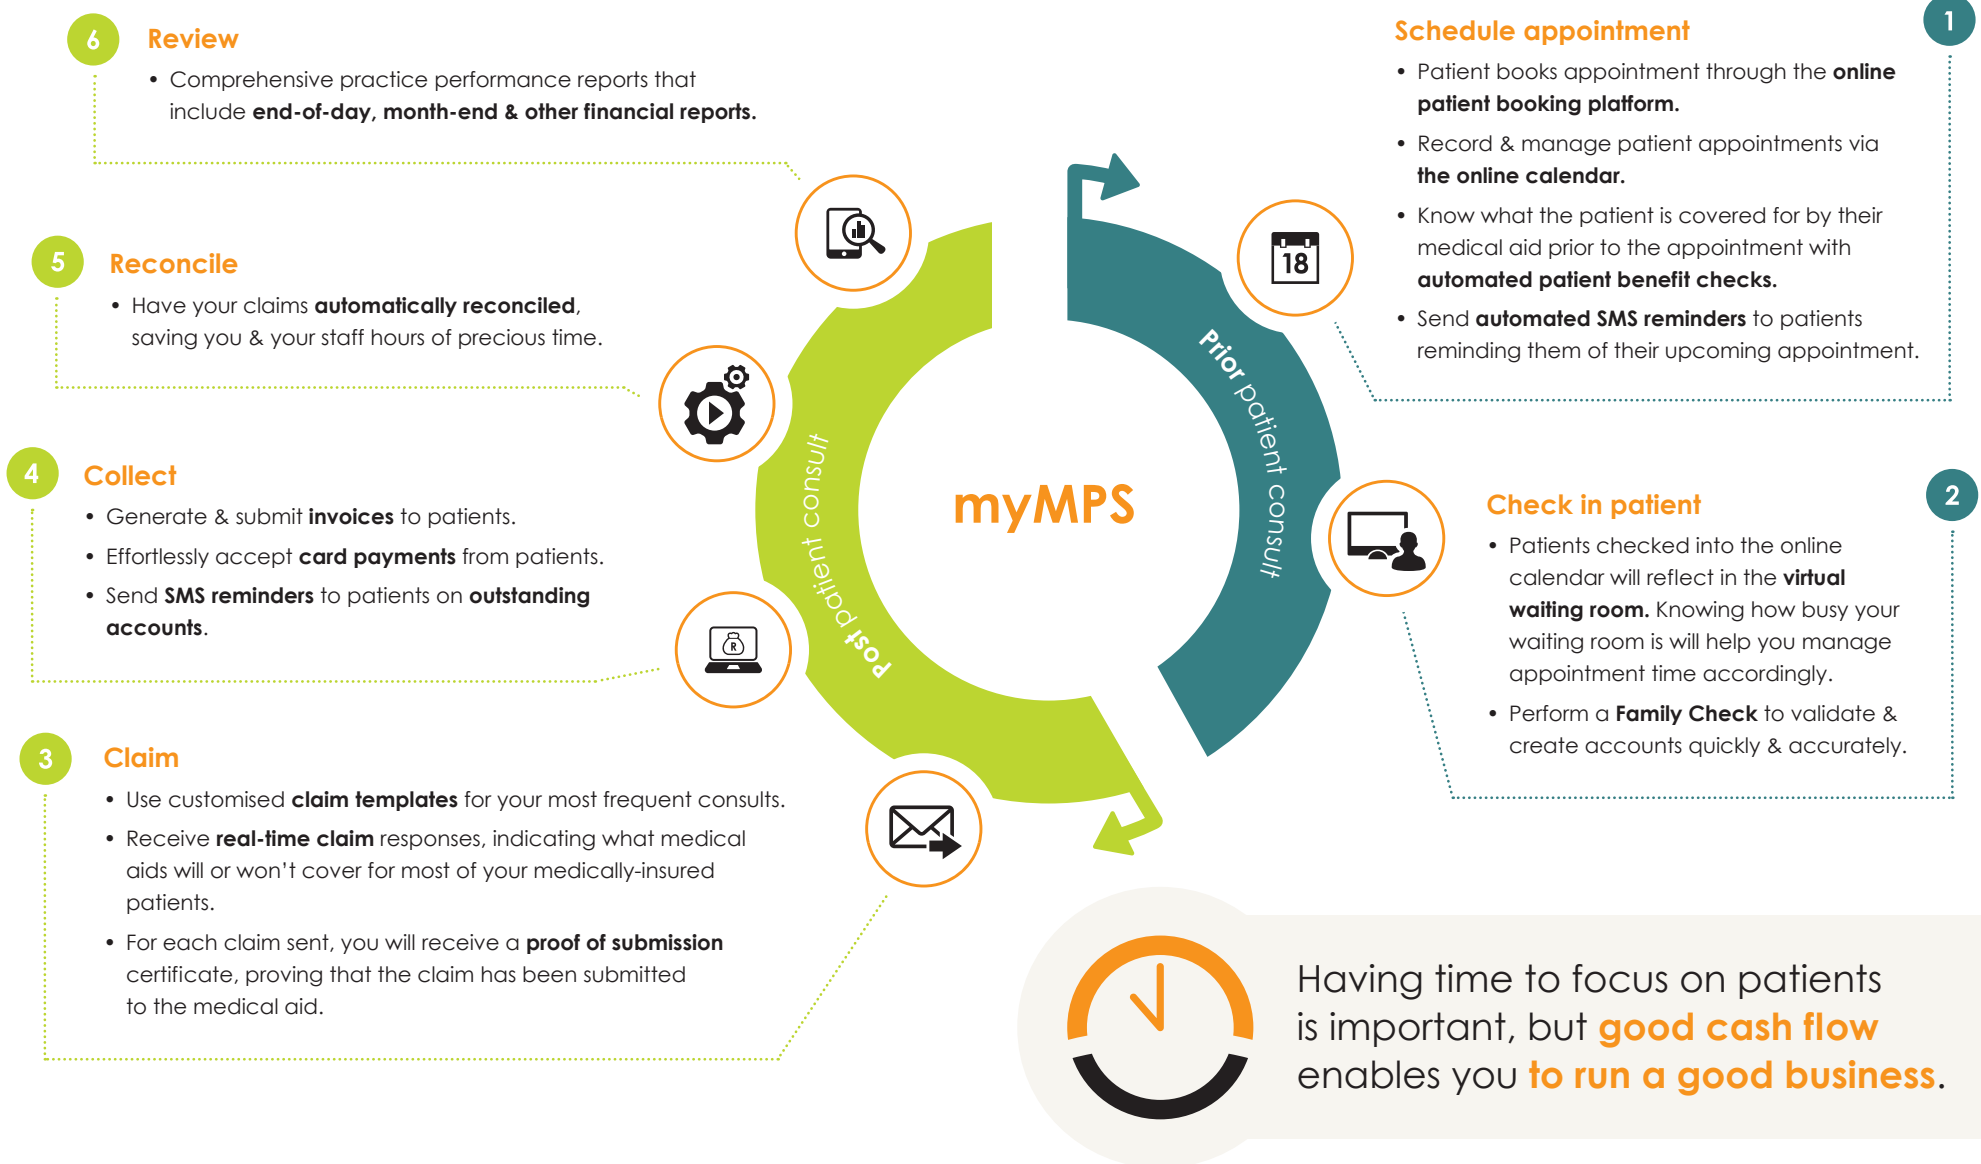

- **Admin made simpler & more efficient:** Automation of basic tasks such as appointment reminders, checking patient benefits, member validations & reconciliations means more time for your practice staff to focus on running a profitable practice.
- **Advanced medical aid billing:** Up-to-date & accurate pricing ensures you get paid optimally from the different medical schemes, with fewer rejections.
- **Understand the financial health of your practice:** With comprehensive easy-to access reports, you will know how your business is performing financially & operationally. Gain further insights into practice performance via Operational, Financial & Clinical dashboards.
- **A great solution backed by great support:** Easy access to support via phone, chat & email at no additional cost. Plus, no long-term contracts with a clear & simple pricing model that offers affordable ways to grow your practice.

More than **5 000 medical professionals** already trust us with the business side of their practice.

# How myMPS works in your practice

# Features & benefits

-  **Online Calendar:** Schedule & manage appointments online.
-  **Automated Benefit Checks:** Automated patient benefit checks will let you know how much funds a patient has.
-  **Membership validation:** Validate membership details for all dependents.
-  **Claim templates:** Create customised claim templates for your most frequent consults.
-  **Pricing templates:** Create your own pricing templates.
-  **Real-time Claiming:** Receive fully-processed claim responses, indicating what medical aids will or won't cover for most of your medically-insured patients.
-  **Proof of Submission:** For each claim sent you will receive a claim certificate, proving that the claim has been submitted to the medical aid.

-  **Invoicing:** Generate & submit invoices to medical aids &/or patients & insurance companies.
-  **Automated Reconciliations:** Have your claims automatically reconciled, saving you & your staff hours of precious time.
-  **Task management Inbox:** Manage all admin action items in a simple workflow & centralised place.
-  **SMS Notifications:** Send SMS reminders to patients, including notifications on outstanding accounts & upcoming appointments.
-  **Financial & operational reports:** Customisable reports that allow you to understand & monitor key financial & operational metrics in your practice.
-  **Single & multi branch set-up:** Set-up & assign system users to multiple allocations allowing simplified processes.

## Optional value-added services

-  **Bulk SMS:** Send customised reminders, notifications, birthday wishes & alert text messages to all your patients, directly from myMPS.
-  **RecoMed:** An online healthcare marketplace & patient appointment booking platform.
-  **SnapScan:** Allows practices to receive payments via Snapscan.
-  **Business Insights Dashboard:** Advanced business insights that illustrates Financial, Operational & Clinical metrics for better decision & practice performance monitoring.
